

Hello Northcentral PATS Members! I would like to introduce myself, I am Joanna Entz (Baltz) and I am running to be your next Northcentral PATS representative. I have been an active member of PATS since 2010 and have served in several different roles including convention committee member, registration chair, onsite registration chair, continuing education committee member and Young Professional Committee member. Various projects I have worked on included but are not limited to establishing the PATS mentorship program, researching to ensure that every secondary school in the state was provided with athletic training coverage and being a Concussionwise Instructor.

Additionally, I am 2014 graduate of Lock Haven University and 2015 graduate of California University with a Master of Science in Sports Psychology. This past year I had the opportunity of returning to my alma mater to work as a member of the Lock Haven Athletic Training Staff as well as working per diem for UPMC Susquehanna. Being active in the profession and community of athletic training is one of my passions and I look forward on getting to know and hearing the ideas of the members of the northcentral region on ways we can add, improve and move forward with our profession. I believe strongly in an open door policy and want to hear from members of the region and maintain an open line of communication.

Outside of athletic training I enjoy, spending time with my family and friends including my husband Evan and one year old daughter Bella, running, activities at church, gardening, spending time outside and going on vacation when time permits.

I would like to thank my mentors and friends for their support and nomination for Northcentral Representative.
