

PATS Student Symposium
 Clinical Breakout Sessions
 Saturday - April 1st, 2017
 Speaker & Presentation Descriptions

	Speaker	Presentation Title	Presentation Description
1	Dr. Megan Cannon	Sports Psychology - Mind of an athlete	This session will consist of an in-depth discussing how the mind of an athlete works best, in addition to identifying signs and symptoms to recognize in the overall interest of the athletes' emotional health.
2	Prof. Samantha Fessler Prof. Connor Saker	Sports Nutrition	The program will provide a theoretical basis, as well as practical applications for assessments, geared at optimizing nutritionally based strategies for enhancing athletic performance. Clinical case study exploration will be modeled towards individualized nutritional strategy development for the contemporary collegiate athlete.
3	Dr. Kelly Harrison	Integrated Neuromuscular Inhibition Technique	This presentation will provide the participants with instruction and hands-on practice in applying the Integrated Neuromuscular Inhibition Technique to common trigger point areas.
4	Prof. Chelsea Jacoby	Keeping Up With a Multicultural World - Embracing Diversity & Cultural Competence in Athletic Training	The changing US demographics poses a desperate need for clinicians to appreciate and respect cultural differences and apply such into patient care. The objective of this session is to expose students to the elements that form and define culture and provide practical tips on how to work respectfully and effectively with diverse populations and in a diverse work environment.
5	Dr. Jane McDevitt	Don't Let your Concussed Athletes Sit in the Dark...See the Light With Vestibular Ocular Rehab Techniques	Students will learn and practice vestibular ocular concussion assessment tests. Additionally, students will learn and have the opportunity to practice how to use these tests as rehabilitative tools.

6	Dr. Scott Dietrich	Advanced Functional Progressions for Throwing and Striking athletes	This activity-based demonstration will summarize (1) recent functional movement screen findings for collegiate baseball and softball athletes, (2) how to establish quick and measurable functional goals to evaluate rehabilitation progress and (3) a detailed demonstration of the Turkish get up exercise progression and the Advanced Throwers 10
7	Dr. Christina Merckx	You're Hired!...April Fools! The Do's and Do Not's of Interviewing	This session is intended to prepare students for job and graduate assistant interviews. There will be lecture, including the most updated information regarding how to interview well and scenarios of interview mistakes. This session will include lecture, interview drills, and group work.
8	Dr. Jason Scotti	Suturing & Injection Tutorial	This session will include an overview of suturing techniques and knots along with a general overview on removing techniques, aseptic techniques and possible complication scenarios.
9	Prof. James Sheldon	Take Stress Off Your Neck With Lay Equipment Athletes	In this session, the students will have the opportunity to practice evaluation process, equipment removal, and cervical spine management for lay athletes.
10	Prof. Braden Lawson	Who Needs White Tape When There is Leukotape?	The presentation will be a lecture and learning lab presenting alternative taping techniques. The techniques will be based on theories and applications created by Jenny McConnell. The participants will learn and practice alternative taping techniques such as the navicular support, Achilles, medial tibial stress syndrome, hamstring, and greater trochanter.
11	Dr. Kelly Moran	Contemporary Techniques in the Evaluation of Sacroiliac Joint Dysfunction	In this session, the students will have the opportunity to learn about the evaluation process for SI dysfunction.
