Highlight:

Non-Operative Management of Individuals with Non-Arthritic Hip Pain

Ryan P. McGovern, MS, LAT, ATC

This presentation will provide evidence for non-operative or conservative management of individuals with non-arthritic hip pain based on the current peer-reviewed literature. The current standard of care for non-arthritic hip conditions including operative and non-operative management will be presented. Recent experimental research will be provided to establish recommendations for a comprehensive conservative rehabilitation plan.
